The Bansang General Hospital eye unit staff consisting of a Principal Ophthalmic Medical Assistant (POMA), an Ophthalmic Medical Assistant (OMA), a Community Ophthalmic Nurse (CON), a Community Nurse Attendants (CAN) and students from the regional ophthalmic training school did the screening in the above-mentioned communities.

The screening was sponsored by Cataracts Are Curable -The Gambian Project.

The main objective was to treat those with ailments that did not require surgery and to identify those with mature cataracts.

The community sensitization at Brikama Ba was carried out by Mr. Tamba Touray, a CON at the health centre. He works hand in hand with the community health workers and the village Alkalo for sensitization; the Imams are also put in picture to make announcements at their various mosques. The community Radio at Brikama Ba is not functioning at the moment so there were no radio announcements to the community this time around.
