This is the fourth child whose glasses we paid for. She is also a schoolgirl who lost her father at a tender age. Her mother, like the others, couldn't afford to pay for the glasses. We've also given fares to the 2 who came from North Bank beyond Essau.

We used GMD20k for cataract operations and the other GMD20k for glasses. We also gave fares to the 2 from Nuimi.

Some of the glasses, especially for the older students, are photochromatic, so they can be user-friendly outside the classroom in the sun.
